PUBLICATION INFORMATION

CERCETĂRI MARINE/RECHERCHES MARINES is an open access international journal which publishes papers on all aspects of marine and coastal environment, preferably but not only from the Black Sea basin area. Minimum two international referees review each manuscript. International Editorial Board members advise the editors on the selection of supplementary referees.

The authors are responsible for the scientific content of their articles published in the present volume.

A catalog record of this book is available from the Romanian National Library.

The types of papers that can be submitted for consideration by the International Editorial Board are:

a) ORIGINAL SCIENTIFIC PAPERS:

Should report only original results. They are limited to 20 printed pages (80,000 characters). The publication of larger articles is subjected to the Editor's agreement.

b) REVIEW ARTICLES:

They should be invited by the Editor. They should be concise / up to 25 printed pages (100,000 characters), critical and creative. They should seek to stimulate topical debate and new research initiatives. Prospective authors are asked to send an extended abstract (two pages maximum) of their paper to the Editor by e-mail. The abstract should outline why the review is topical, its main points and objectives, and how it will stimulate debate and research. When the proposal has been accepted by the Reviews Editor, he will invite the author to submit a manuscript within an agreed time limit and following the general guidelines for submission of standard papers.

c) SHORT COMMUNICATIONS:

Short communications, which do not occupy more than four printed pages (16,000 characters) are short papers that present original and significant material for rapid dissemination and addressing new ideas, controversial opinions, "negative" results and much more.

d) CONFERENCE PAPERS:

Conference papers should report only original results which were presented at the conferences and symposia. They should be submitted as like as original research papers.

MISCELLANEOUS:

e) Anniversaries, evocations, personalities, *varia*, *in memoriam*, editorial signal, reviews. They are limited to 10 printed pages (40,000 characters). The publication of larger articles is subjected to the Editor's agreement.

Acceptance of papers: Papers will normally be critically reviewed by two experts in relevant disciplines and evaluated for publication by the Editor; however, the Editor may return to authors without review any manuscripts deemed to be inadequate quality or inappropriate for the journal.

CONTENTS

| | |
|---|---------|
| The Variability of the Beach Morphology and the Evolution of the Shoreline in the Strongly Anthropized Sector of Eforie North, the Romanian Coast of the Black Sea <i>Alexandru-Cristian Cîndescu, Silică Petrișoiaia, Dragoș Marin, Luminița Buga, George Sîrbu, Alina Spînu</i> | 6-18 |
| The Sea Cliffs Exposure and Management in 2 Mai – Vama Veche Shore Sector <i>Elena Vlăsceanu, Dragoș Niculescu, Liliana Rusu, Răzvan Mateescu</i> | 19-29 |
| Investigations on the Waves Transformations in the Areas of Romanian Maritime Ports <i>Răzvan Mateescu, Liliana Rusu, Elena Vlăsceanu, Dragoș Niculescu, Ichinur Omer</i> | 30-39 |
| Diversity and dynamics of tintinnids communities from Romanian Black Sea, in 2021 <i>Cristina Tabarcea, George-Emanuel Harcotă, Luminița Lazăr</i> | 40-49 |
| Romanian Black Sea Mesozooplankton's Seasonal Dynamics and Distribution during 2013-2020 <i>Elena Bișinicu, George Emanuel Harcotă, Victor Cristea</i> | 50-62 |
| Tannic Acid Content in the Cultured Diatom <i>Skeletonema costatum</i> (Greville) Cleve 1873, Isolated from the Romanian Black Sea Waters <i>Oana Vlas, Laura Bucur, Marius Făgăraș</i> | 63-69 |
| Status of the Rapa Whelk Agglomerations along the Romanian Black Sea Coast <i>George Țiganov, Victor Niță, Cristian Sorin Danilov, Catalin Păun, Dragoș Diaconu, Daniel Grigoraș, Magda Nenciu, Mădălina Galațchi</i> | 70-82 |
| Valorization of Mussel Waste from the Romanian Black Sea Coast <i>Daniela Mariana Roșioru</i> | 83-91 |
| Alternative Approach to the Segmentation of Fishing Fleets <i>Daniel Grigoraș, Cătălin Valentin Păun, George Țiganov, Cristian Sorin Danilov, Dragoș Diaconu</i> | 92-105 |
| Chemical versus Natural Biocide Compounds - Minireview on Antifouling Coatings <i>Manuela Apetroaei, Verginica Schroder, Valeriu Iancu, Irina Iancu</i> | 106-121 |
| Are Differing Viewpoints Amongst Key Actors Influencing Implementation of Key EU Marine Environmental Policies? Case of Strictly Protected Areas <i>Sašo Gorjanc</i> | 122-146 |
| Short communication: Forecasting Shellfish Aquaculture Threats. An Earth Observation Derived Tool Aiming at Avoiding Microbiological Public Health Hazards <i>Victor Niță, Răzvan Mateescu, Magda Nenciu</i> | 147-152 |
| <i>In memoriam</i> – Simion Nicoalev | 153-160 |
